MATERIALS SCIENCE & ENGINEERING B

Subject Index of Volume 30

Adatoms
ab initio studies of single-height Si(001) steps, 167
Aluminum
photo-assisted direct writing of conducting aluminum, L5
Annealing
influence of rapid thermal annealing on the properties of SnO_2 thin films, 1
Atomic ordering
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, 187

Bean-curd refuse
preparation of SiC and Si_3N_4 whiskers using bean-curd refuse as the Si source, 13

Carbon fibers
fluorine-intercalated carbon fibers. II: An X-ray photoelectron spectroscopy study, 61
Chemical vapour deposition
photo-assisted direct writing of conducting aluminum, L5
Clusters
kinetics of epitaxial growth and roughening, 149

Defect formation
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, 43
Dielectric
dielectric studies of lanthanum heptamolybdate crystals grown from gels, 7
Dielectric relaxation
reliability of radio frequency dielectric experiments in perovskites, 55
Diffuse transition
reliability of radio frequency dielectric experiments in perovskites, 55
Diffusion
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, 43
Dislocations
fabrication and application of relaxed buffer layers, 201
island formation in Ge/Si epitaxy, 197
Doping and impurity implantation
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, L1

Elastic modulus
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, 35
Electrochemical measurement
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, 19
Electron mobility
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, 39

Epitaxy
atomic structure of surfactant monolayers and its role in epitaxial growth, 175

Far-IR spectroscopy
far-IR study of electron-phonon interaction and phase transition in α-$In_2S_{3-x}Se_x$($2.4 \leqslant x \leqslant 3.0$) crystals, 27
Ferroelectric
dielectric studies of lanthanum heptamolybdate crystals grown from gels, 7
reliability of radio frequency dielectric experiments in perovskites, 55
Fluorides
fluorine-intercalated carbon fibers. II: An X-ray photoelectron spectroscopy study, 61
FTIR spectroscopy
far-IR study of electron-phonon interaction and phase transition in α-$In_2S_{3-x}Se_x$($2.4 \leqslant x \leqslant 3.0$) crystals, 27

GaAlAs
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, 39
Gallium arsenide
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, 143
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, 43
in-situ X-ray studies of organometallic vapor phase epitaxy growth, 99
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, 109
role of steps in epitaxial growth, 121
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), 73
structure and formation energy of steps on the GaAs(001)-2×4 surface, 127
structure and thermodynamic stability of GaAs(001) surfaces, 81
Ge/Si growth
island formation in Ge/Si epitaxy, 197
Gel-grown
dielectric studies of lanthanum heptamolybdate crystals grown from gels, 7
Growth
atomic structure of surfactant monolayers and its role in epitaxial growth, 175

Heterostructures
fabrication and application of relaxed buffer layers, 201
Hydrogen storage alloys
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, 19

Elsevier Science S.A.

Indium phosphide
kinetic roughness in epitaxy (experimental), 137
Ion implantation
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, L1
Island formation
island formation in Ge/Si epitaxy, 197

Lanthanum heptamolybdate
dielectric studies of lanthanum heptamolybdate crystals grown from gels, 7

Magnetic field effect
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, 23
Magnetic sheets
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, 23
Metals
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, 35
Method of successive reactions
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, 23
MH electrode
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, 19
Mixed III–V layers
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, 187
MOCVD
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, 39
Molecular beam epitaxy
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, 143
kinetic roughness in epitaxy (experimental), 137
kinetics of epitaxial growth and roughening, 149
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, 87
role of steps in epitaxial growth, 121
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), 73
Molecular dynamics simulations
ab initio studies of single-height Si(001) steps, 167

Ni–MH battery
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, 19

OMCVD
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, 109
OMVPE
in-situ X-ray studies of organometallic vapor phase epitaxy growth, 99
Order–disorder
reliability of radio frequency dielectric experiments in perovskites, 55

Phase separation
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, 187
Photolysis
photo-assisted direct writing of conducting aluminum, L5

Reflectance-difference spectroscopy
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, 109
RHEED
in-situ X-ray studies of organometallic vapor phase epitaxy growth, 99
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, 87

Scanning tunneling microscopy
role of steps in epitaxial growth, 121
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), 73
Selenium
far-IR study of electron-phonon interaction and phase transition in α-$In_2S_{3-x}Se_x$($2.4 \leqslant x \leqslant 3.0$) crystals, 27
Semiconductors
atomic structure of surfactant monolayers and its role in epitaxial growth, 175
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, 87
Si-based ceramics
preparation of SiC and Si_3N_4 whiskers using bean-curd refuse as the Si source, 13
Silicon
preparation of SiC and Si_3N_4 whiskers using bean-curd refuse as the Si source, 13
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, L1
Si(001)
ab initio studies of single-height Si(001) steps, 167
Skin effect
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, 23
Step edge barrier
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, 143
Step edges
ab initio studies of single-height Si(001) steps, 167
Strain
fabrication and application of relaxed buffer layers, 201
Sulphur
far-IR study of electron-phonon interaction and phase transition in α-$In_2S_{3-x}Se_x$($2.4 \leqslant x \leqslant 3.0$) crystals, 27
Surface composition
fluorine-intercalated carbon fibers. II: An X-ray photoelectron spectroscopy study, 61
Surface diffusion
kinetic roughness in epitaxy (experimental), 137
Surface dynamics
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, 143
kinetics of epitaxial growth and roughening, 149
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, 87
Surface energy
fabrication and application of relaxed buffer layers, 201
structure and formation energy of steps on the GaAs(001)-2×4 surface, 127
structure and thermodynamic stability of GaAs(001) surfaces, 81
Surface morphology
influence of rapid thermal annealing on the properties of SnO_2 thin films, 1

kinetics of epitaxial growth and roughening, 149
role of steps in epitaxial growth, 121
Surface reconstruction
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, 187
Surface roughness
kinetic roughness in epitaxy (experimental), 137
Surface structure
structure and formation energy of steps on the GaAs(001)-2 × 4 surface, 127
structure and thermodynamic stability of GaAs(001) surfaces, 81
Surfaces
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, 109
Surfactants
atomic structure of surfactant monolayers and its role in epitaxial growth, 175

Temperature dependence
island formation in Ge/Si epitaxy, 197
Thermal diffusion
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, L1
Thin films
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, 35
influence of rapid thermal annealing on the properties of SnO_2 thin films, 1
Tin oxide
influence of rapid thermal annealing on the properties of SnO_2 thin films, 1
TMAA
photo-assisted direct writing of conducting aluminum, L5
Total binding energy
structure and formation energy of steps on the GaAs(001)-2 × 4 surface, 127
Transmission electron microscopy
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, 43
Two-layer vibrating reed
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, 35

X-ray spectroscopy
fluorine-intercalated carbon fibers. II: An X-ray photoelectron spectroscopy study, 61
X-ray studies
in-situ X-ray studies of organometallic vapor phase epitaxy growth, 99

Zinc selenide
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), 73
Zn doping
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, 39
